Bead Molds

IMF Instrumentation & Model Facility

Experienced, trusted, and courteous

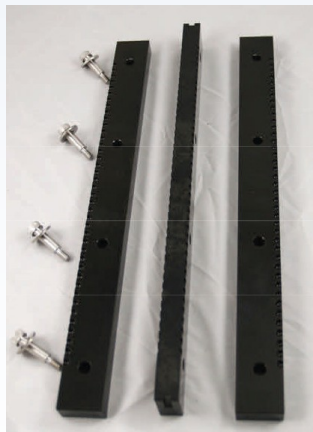

Our Models

The Instrumentation and Model Facility has been fabricating bead molds since 1986. All molds are made of high quality ground carbon steel, coated with Teflon.

Molds are available in two and three tiered varieties. The two-tier mold makes a single strand of beads and the three-tier mold makes two strands of beads simultaneously. The 3.2 millimeter version makes 50 beads per strand, the 4.0 millimeter version makes 40 beads per strand, and the 6.4 millimeter version makes 25 beads per strand. The 7.0 Millimeter mold makes 30 beads per strand.

Two-tier Model

Three-tier Model

Pricing

Please view our pricing table below for information on specific model and size combinations. Shipping and Handling is included in the prices below.

Bead Diameter	Two-tier Model	Three-tier Model
3.2 millimeters	\$1,132 (Model No. 322T)	\$1,704 (Model No. 323T)
4.0 millimeters	\$1,040 (Model No. 402T)	\$1,640 (Model No. 403T)
6.4 millimeters	\$1,015 (Model No. 642T)	\$1,536 (Model No. 643T)
7.0 millimeters	\$1,132 (Model No. 702T)	\$1,704 (Model No. 703T)

Custom orders can be built to your specifications allowing for about four to six weeks for delivery.

Care

Depending on the amount of usage, bead molds will need to have their Teflon coating periodically stripped and reapplied. For information regarding having molds recoated visit <http://donwell.com> or contact them directly at:

Donwell Company Inc.
