Our low cost, customizable maintenance management programs are designed to match the unique equipment and finances of each institution. This ensures the safety of your medical equipment and provides peace of mind for your staff and patients. These services are designed to ensure the safety and output quality of your specialty equipment day after day.

Why perform preventive maintenance?

- The American Society of Healthcare Engineering (ASHE) recommends regular inspections
- Preventative Maintenance ensures patient and staff safety
- Preventative Maintenance will lengthen the life of your equipment

TSP will perform:

- Performance verification
- Preventative maintenance/cleaning
- Calibration and safety inspections

Our services are available on campus to the University of Vermont as well as at other universities, healthcare and government facilities, school systems, and local industries at reasonable rates with estimates provided if requested.

Services Provided

Basic Services:
TSP offers preventive maintenance, calibrations, and repair and safety inspections for most medical devices including defibrillators, ECG monitors, oto/ophthalmoscopes, thermometers, Vital Signs monitors and many others.

Specialty Services:
TSP also offers preventative maintenance, calibrations, repair, and safety inspections for a wide variety of specialty devices including:

- Audiometers
- Centrifuges
- Physical therapy: modalities, treadmills, dynamometers, etc.
- Microscope cleaning and repair
- Sterilizers (autoclaves)
- Surgical instrument sharpening and repair
- Clinic equipment

We can extend the life of your equipment.
